

§ 1480.18 Value loss crops.

(a) Irrespective of any inconsistent provisions in other sections, this section shall apply to the following crops, which are considered “value loss crops”: ornamental nursery; Christmas trees; vegetable and root stock including ginseng root; aquaculture, including ornamental fish, and such other crops as may be determined appropriate for treatment as “value loss crops”.

(b) For crops specified in paragraph (a) of this section, disaster benefits under this part are calculated based on the loss of value at the time of disaster, as determined by CCC.

(c) For aquaculture, disaster benefits under this part for aquacultural species are limited to those aquacultural species that were placed in the aquacultural facility by the producer. CDP benefits shall not be available for aquacultural species that are growing naturally in the aquaculture facility. Benefits under this part are limited to aquacultural species that were planted or seeded on property owned or leased by the producer where that land has readily identifiable boundaries, and over which the producer has total control of the waterbed and the ground under the waterbed. Producers who only have control of the waterbed or the ground under the waterbed but not both will not be eligible for disaster benefits under this part.

(d) For ornamental nursery crops, disaster benefits under this part are limited to ornamental nursery crops that were grown in a container or controlled environment for commercial sale on property owned or leased by the producer, and cared for and managed using good nursery growing practices. Indigenous crops are not eligible for benefits under this part. Producers who participated in the previous Florida Nursery Program are eligible for either of the following:

(1) 2001 losses that occurred between January 1, 2001 and September 30, 2001.

(2) 2002 losses that occurred between October 1, 2001 and September 30, 2002.

(e) For vegetable and root stock, disaster benefits under this part are limited to plants grown in a container or controlled environment for use as transplants or root stock by the pro-

ducer for commercial sale on property owned or leased by the producer and managed using good rootstock or fruit and vegetable plant growing practices.

(f) For ginseng, only ginseng that meets all the requirements of cultivated ginseng shall be considered as eligible for benefits under this part. Ginseng is defined as cultivated ginseng roots and seeds that meet the following requirements:

(1) Grown in raised beds above and away from wet and low areas protected from flood;

(2) Grown under man-made canopies that provide 75 to 80 percent shade coverage;

(3) Grown in well drained media with a pH adjustment of at least 5.5 and which protects plants from disease; and

(4) Grown with sufficient fertility and weed control to obtain expected production results of ginseng root and seed.

(g) Evidence of the above ginseng practice requirements must be provided by the producer if requested by the county committee. Any ginseng that is grown under cultivated practices or simulated wild or woodland conditions that do not meet these requirements are not eligible for disaster assistance under this part.

(h) Because ginseng is a perennial crop, the producer must provide annual crop history to establish when the loss occurred and the extent of such loss. If the producer does not or is unable to provide annual records to establish the beginning inventory, before the loss, and ending inventory, after the loss, production shall be assigned by the county committee.

(i) Aside from differences provided for in this section, all other conditions for eligibility contained in this part shall be applied to value loss crops.

§ 1480.19 Other provisions for specialty crops.

(a) For turfgrass sod, disaster benefits under this part are limited to turfgrass sod that would have matured and been harvested during 2001 or 2002, when a disaster caused in excess of 35 percent of the expected production to die.

(b) For honey, disaster benefits under this part are limited to table and non-
